

This is a key event in the calendar of the members of the Institute of Chemical Engineers and this year saw KHI make its debut as one of 120 exhibitors.

Held in late October at the NEC in Birmingham, this year's show attracted over 1000 visitors from across Europe and featured an Awards Dinner which was hosted by Brittas Empire and Red Dwarf star Chris Barrie.

Interest in KHI was encouraging, with many visitors to our stand being positive about working with KHI. Our focus now is to consolidate some of the opportunities that were presented at the exhibition.
