

FOR IMMEDIATE USE – July 2020

## **Congratulations to New Graduates**

Congratulations to K Home International's young engineers Grant Anderson & Alex Bottomley who have recently achieved Junior Engineer status.

Grant & Alex received their official confirmation from Teesside University on 1<sup>st</sup> July that they both achieved a Bachelor of Engineering with First Class Honours.

Grant's qualification is in Civil Engineering

Alex's in Electrical & Electronic Engineering

After completing their apprenticeships with K Home International Ltd they have been working in the office and on sites whilst also studying Engineering at Teesside University on day release basis over the past 4 years.

They have managed to gain the highest level of degree qualification despite the difficulties imposed by the COVID-19 lockdown.

Mark Chatterton is personally very proud of their achievements as their Director of Engineering and believe that our "Home" grown talent sets us in good stead for the future of K Home International.
